

MERRY CHRISTMAS

Oh Well, it's that time of year again and as I type the first snow of the year is quietly melting in the background.

As with everything costs are rising so we have had to return the subscriptions back to £20, hopefully this will give us some spare cash to spend on our displays for events.

On the whole it's been a good year for the Acorns Club, 7 events and 3 activity afternoons plus some talks and the new social coffee meetings. It seems that Covid is now hopefully under control and we can look forward to another busy year of activities in 2023.

Propagation is livening up and as cycle 25 progresses it can only get better, 10 metres is starting to become active regularly and is always worth a look. By far FT8 is gaining the most attention and it never fails to amaze me just how low a power you can use.

THIS YEARS LAST EVENT

The last event of 2022 will be a coffee meet at Essex Wildlife Trust Mucking this Saturday 17th December at 1pm. Please let me know by email if you are coming chair@taarc.co.uk. If the weather is still bad, check in on the Friday net we may need to change the venue.

AND FINALLY

The subject for the talk at the January meeting on 26th will look at the ever popular Nano VNA (other brands are available) and what it can do other than setting up antennas, hopefully you will enjoy my presentation.

HAPPY NEW YEAR
