

CANVEY RALLY 4th FEBRUARY

Well it's getting close to that time again when the Canvey Rally signals the start of a new events year.

This year the club have a stall and will be selling any surplus and donated items to raise the club's funds, if you have anything to donate or indeed sell contact James (station@G1JOB.co.uk).

NEXT CLUB MEETING

For our next meeting on Tuesday 6th February Justin G8YTZ will be giving a talk and demonstration of Amateur Fast Scan TV at the Thurrock Bowls Club starting at 7:00pm. This is a first for the club so I hope as many as possible will attend, it is open to members and friends, so come along and find out more about a little known side of the hobby. The bar is open for the meeting.

FEEL LIKE SOME FRESH AIR?

James G1JOB has organised a SOTA activation of G/SE-005 Botley Hill on 17th February, there is no parking at the summit and an approx. 600m hike up the hill is required.

Contact James (station@G1JOB.co.uk) if you are interested in participating. Why not get on the air and try to get the numbers up?

2 METRE ACTIVITY AFTERNOON REPORT

Well I'm not sure what went wrong here but as a club we failed to get the word out and the event was somewhat a damp squib. Was it too close to Christmas and the New Year, possibly, but I guess we will never know. I spent about an hour calling but I don't think I have ever heard 2m that quiet, so I gave up having made no contacts and went to find something more interesting to do.

REMEMBER THE NEXT ONE IS ON 16TH MARCH — YOU HAVE BEEN WARNED!

Eddie G0BKL

AND FINALLY

Members are reminded that following the changes being made to our licence's will mean that new licence documents will have to be issued, they should conform their details are correct on Ofcom's database by logging in to their website.
